

Computers in Education Society of Ireland
Cumann Ríomh-Oideachais na hÉireann

CESI Computer Science Community of Practice

Venue: Waterford Teachers' Centre
Date: Wednesday, 6th December 2017
Time: 7 p.m. – 9 p.m.
How to Book a Place: Book ONLINE www.wtc.ie

The Computers in Education Society of Ireland (CESI) is a teacher professional network for anyone with an interest in the potential of technology to enhance the teaching and learning experience for all involved in education. CESI was founded in 1973 and has always been prepared to adapt to a speedily changing landscape. Online technology has enabled the society to overcome the twin barriers to participation (distance and time) and facilitated the development of a strong community online.

Earlier this year CESI welcomed the announcement of the intended introduction of Computer Science (CS) as a Leaving Certificate Subject in September 2018. Since then great work has been done by the NCCA Development team with a draft syllabus published in early summer and ongoing consultation taking place.

On 16 September 2017, CESI hosted a Computer Science Symposium at NUI Maynooth which was open to anyone with an interest to be present. A Computer Science Community of Practice was launched at the event. CESI is delighted to announce the receipt of sponsorship from Google which will support this exciting endeavour over the coming year 2017-18.

The expected membership of the CoP will be educators representing all regions of Ireland and will nurture practice-led collaboration at local levels between teachers, schools, universities and industry, and support teachers in the introduction of Computer Science, including Computational Thinking and coding. CESI sees as a critical priority the need for appropriate and sustainable teacher education, both formal and informal, which will be vital to making a success of this initiative, and CESI looks forward to playing its part.
